HUMAN LIFE VERSUS GAIN.

Half of the electric light wires are imperfactly insulated and hence uprafe. This has been shown by a simple examination of the wires in the face of the protestations of interested companies that the wires were harmless. Yet when the authorities, through interest in the lives of citizens, wished to remove these deadly wires, the interested companies zushed for the help of the law and procured an injunction to stay this attempt to protect

HUERY UP.

Hurry up with the World's Fair. If it is to be in New York the rich men must put their purses together as well as their heads, Money talks in this matter louder than in any other. Don't wait for one man to shoulder the whole thing. One man isn't to get the whole benefit. Chicago knows the worth of money as well as New York, but seems to know, too, that if something is to be bought it has got to be paid for. Hurry up.

A policeman in court yesterday said a barkeeper had not sold him any liquor, though his bar was open. The barkeeper, when called on, admitted that he had sold the po-Roeman a whiskey cocktail. This was a refreshing contrast. The man who sold liquor and had the honesty to confess it was a good set-off to the officer of the law who got the drink and tried to "fix" the thing up by denying it. And yet the policeman was allowed to go out unpunished.

FANCIES OF FASHION.

Some clever Briton has written a manual for the benefit of fashionable lady smokers. Among many rules the furnerses are cautioned against smoking out of doors or in any public place even when at-tended by their husbands. The votary of the weed should never light a eigarette after 5 o'clock, even in the company of intimate friends; the best time to amoke is after means and the best place in the boudeir. The tissue-wrapped tobacco must be carried to the lips gracefully, held in the centre and never at the side of the mouth, and the function is directed to smoke with great deliberation, and blow gentle wreaths of otherealized escence around her.

Wonderful hunting experiences are what you want. I suppose. Weil, I had one once, and here it is. I was in the licekies in the Winter of 77. Went there in spect of health. I had a good rough and ready man with me for a guide. He was a Cheyenre man and had spent all his principally from the Eastern, Middle and Westlife on the plains and in the diggings. We started out from Placer one morning

loaded for big game. We went up the Vita Pass tilt we got where there was lots of snow, and then struck out into the wilderness on the nountains. We tramped an hour or two and it segan to snow great guns. Suddenly we came to a gulley, and in it were

therd of deer, theltered from the storm by a little clump of trees. Bill Marks walked around to the other side of that gully and gave a signal and we began to fire our repeaters. Of course the deer fled, but after all was over

we went down into the valley and found that no less than thirty deer had fallen. This isn't much of a story, but it's true. I send you my name, but only print TRUTHFUL JEEMS.

A Turkey Hunt for a Wife.

When I was a boy I was courting a farmer's laughter in the interior of this State, but as her folks objected to me our opportunities for meeting were very few. One evening I received a note from her, saying her folks were going to be away next day.

I accerdingly went to her house, intending to ake her for a drive. I found her in sore dis- all ess. Her father had a number of fine fat turkeys which he had engaged to sell in the city for Chanksgiving. The time was only two days off, at that morning, after feeding them, my girl had neglected to fasten the door of the penthere they were cooped, and some fifteen or sixteen had straved away.

She was crying, and f at once said I would recapture the fowls for her. She was so glad. Together we started the hunt. The birds had cattered all over the farm, and some had traved into a patch of woods near by. The sun had gone down before we had the last

arker safety housed again. To make matters wor-e, just as I was preparig to go eway the old folks drove up, and in his isual vigorous way the old man went for me with his riding whip, and I got away in a hurry. The adventure resulted in my getting a wife though, for the girl explained things to her father and he sent for me and said: "Take her boy, she is yours. You have won her in the

Killed His Deer at Half-Mile Range.

My hunting experiences have, as a rule, been very tame and uninteresting; but I had one last month, when on my vacation, which I think is worth recording. I had been tramping all day in the woods about Louis Lake and the little sheets of water of that neighborhood in the Adirondacks and had bagged nothing of any conequence. I was just hungering for deer, and just as I emerged from a bit of forest upon the past as I emerged from a fat of forest apon the reign of one of these little lakes my eyes fell upon a fine stag drinking from the lake, but op-posite to me and fully half a mile away.

It was tentalizing, for I am not a half-mile shooter, and, any way, if I shot the noble fellow he would only dart back into the woods to die, and I would never be able to find him. But I was desperate, and raising my rife I "bimmed" away at him.

I know it was my deer from the permiarity of his horns.

Out Rebel. Ever hear that? It was written by the interary editor of a Ealtimore paper atter the war. His name was not printed on the music, and I do not now recall it. 'The Bennie Blue Flag' has been furied and laid away in the dust of years. It was one of his prefitiest of Southern are.

"Then there was a popular piece of music in Virginia and the far Southern States which I never heard out West. It was called 'Stonewall Jackson's Way.'
"It you were ever in a Southern parlor and asked the young lady to play, you know as well as I that she opened with 'The Mother's Prayer.' It was written by a St. Louis girl. I can't think of her name, but I remember that the was a cartifally according in that she was a captivating secesh girl. I never heard it in the North.

"When I was in New Orleans a year sgo I asked a Southern lady if she knew it. She said she didn't, and then I remembered that

she had grown up since the song was written.
'Did you ever hear how 'My Maryland' came to be written? I don't know that I am telling you anything new. I heard it was written by James Randall, who is, if I am informed correctly, editing a paper in Georgia, He was in camp one night and couldn't sleep on account of numerous attacks of parasites. And he tossed to and fro the lines.

"The despot's heel is on thy shore' Maryland, my Maryland, His touch is at thy temple's door, Maryland, my Maryland."

"It was an inspiration, and very soon it was being sing all around the camb. The music is that of the old German volkson beginning: "O, Tannenbaum! O, Tannenbaum!"

which is, I believe, in English,

O. Pine Tree, O. Pine Tree, How green are thy leaves! " 'My Maryland' is still popular in the South, and was the most inspiriting of all Southern airs,"

Two Well-Known New Yorkers Give In interesting Testimony.

PROOF.

"There is nothing especially new in what I have to give. Indeed, the experience I have to relate is so much lise others that I have read that it seems almost a

of All Southern Airs, and It Is Still Populs concition, but it is none the less very emphatically my The speaker was Mr. Hogh C. Murphy, the woll-known engraver, Sil Nassan street. The interview is notable because some time ago his fast-failing health had convinced him and his friends that he must give up

"You see." Mr. Murphy explained, "I was steadily being in weight and strength. I had little appetite." My sleep was restinss. I was unfit for work. I would get up in the morning feeling more tired than when I went to bed at night. I dreaded the slightest exertion. did not feel like seeing or talking to any one. I was

errors, irritable and despondent; just man irog mysels through my work and that was all." 'How did it begin?" Weil, I can hardly say-it was a long time ago,"

"Several years ago it must have been, and it seemed ould feel raw and inflamed. There would be a dropping brok of muons when I would lie down and a con-backing and raising. My cars and eyes were affected and I feared the worst results to my hearing and eight. There would be continual ringing and burning noises in my ears and my eyes would become

dim and watery,
"For some time I had realized external and
bronchial troubles and that it was extending, but it has
only been within the last year or two that I could see that my health was sariously impaired. One or two members of my family had had long trouble, and I was the more alarmed on that account. "I suffered continually from pains in my head; some

times they were in my forehead, over the eyes, and sometimes in the line's of the hand. It was difficult for me to breathe, and cometines my breathing would be accompanied by a wheezing or whistling noise. "At makit especially there would be a sense of weight and oppression on my clest, and I'd have choking and coughing spells, so that I would have to set up in boder walk the floor. What little I did eat did not seem to

agree with me; my stomach would seem all the time as if it was overloaded. The sense of taste and small seemed to be gone.

"Pains would take me in the cliest and side, running through to the shoulder hindes.

"Did I try to get help? I should think I did. I tried everything and everyhody. In splite of it, however, I

kept steadily growing weaker and werse. I had read in the papers of the work of Drs. Copeland & Bistr. I went to see them myself. Their charges seemed to me be very low and I placed myself nuder their care," "With what result?"
"Well, I improved steadily from the start. My ap-

petite came back. I got refreshing nights of sleep. The cough passed away. My throat became clear and well. I had no more pains in the cheat. I gained steadily in flesh and strength. I feel strong and well now, quite like a different person from what I was when I went under the treatment of these physicians." Mr. Hugh C. Murphy lices, as stated, at 743 Third avenue. He is the proprieter of one of the most extensive wood-engraving establishments in New York, the one located at 82 Nassau street. The interview above

given can easily be verified. A CHARACTERISTIC TALK.

Being from a Business Man It is Brief and Clear.

As one of the representatives of the younger business men of New York Mr. A. W. Thornton, of 35 Grovest, is well known, and his words will have corresponding roubled me. I seemed to be all the time catching cold. My nose would run and then after a time it would be stopped up, first on one side and then on the other. I began to have headarhes. Sometimes there would be a dull pain in my forehead over the eyes and sometimes a pain in the back part of my head. My ears would be pain in the case part of my head. Aly ears would be miled with ringing, buxzing noises and I thought my hearing was being impaired. My eyes would get din and fill with water. I tried glasses, but they did not seem to help me much. Sometimes my eyes would be so weak that I could hardly see to read. I was always homming and hawking and raising phlegm, especially after my meals.

"As the trouble extended to my throat my voice be came hoarse. Sometimes it would have a strained, unnatural sound, and sometimes my throat would be so raw and filled up that I could hardly speak above

"But the effect upon my voice was not the worst fee ture of it. The trouble had extended until it had reached the bronchial tubes. I had raised some blood at different times but I didn't think it amounted to much. One day I had a hemorrhage that really alarmed me. I west to a physician, who told me that I had a severe bronchial trouble and that I was in danger of ling trouble.

"At this time—I think it was about four or five years from the time I have always supposed my trouble began—iny breathing was labored and difficult. I had sharp, shooting pains in my chest, extending through to my shoulder blades. Dizzy spells would come over me, as companied by frequent palpitation of the heart.

"I would get up in the morning feeling more tired than when I went to bed. My sleep did not seem to do

me any good. I lost steadily in flesh. My appetite failed. I had feverish spells followed by a cold, chilly teeling which made me unfit for husiness.

"My stemach became more and more deranged as the trouble extended. I would have a feeling of discomfort and names there after eating. After breakfast I would often be quite sick to my stomach. I would sit down to the table with a bearty appetite and could only eat a few outhfuls. Whatever I would take in my stomach

seemed to rest like a heavy weight there. 'Some time ago some friends of mine told me of their bring successfully treated for estarrhal and bronchist troubles by Drs. Copeland and Blair. At that time ! had grown despendent and had almost given up hope of ever cetting well. I went to see these physicians, how-ever, found their charges very reasonable and placed myself under their care. Although they did not make

nessed under their care. Although they did not make ally glowing promises I left that they could help me."
And did they? My head and throat became clear and well after I had been under their treatment a short time. I gained in weight, had no more hemorrhages, no bure paths on the crest, no more papingerhages, no hours paths on the crest, no more papingerhages, the heart. My friends noticed my improvement and other parameters of the manner of the prating of the heart. I am entirely well now and cardially banking to Das Copeland and Blair for my recovery."
